Project Report
Banking Dashboard Analysis

Name: Saswat Dash
Roll no.: 21ME31067
Project Link: Link

1. Executive Summary:

The objective of this project is to analyze banking data to derive insights regarding client engagement, financial health, and regional performance. The project utilizes a banking dataset to create a comprehensive dashboard that visualizes key metrics such as loan analysis, deposit analysis, and an overall summary of the bank's portfolio.

2. Data Description:

The analysis is based on a dataset containing detailed client profiles. Key attributes within the data include:

- Client Demographics: Name, Age, Nationality (e.g., American, European, Asian), and Occupation.
- Banking Relationship: Client ID, Joined Bank Date, Banking Contact, and Loyalty Classification (e.g., Gold, Platinum, Jade).
- Financial Metrics: Estimated Income, Superannuation Savings, Credit Card Balance, Bank Loans, Bank Deposits, and Foreign Currency Accounts.
- Risk & Asset Profile: Risk Weighting, Properties Owned, and Fee Structures.

3. Key Performance Indicators (KPIs) The dashboard highlights the following high-level metrics which summarize the bank's current standing:

- **Total Clients:** 188
- **Total Engagement Account:** $18.26K
- **Total Credit Card Accounts:** $135
- **Total Loans:** $139.9M
- **Total Deposits:** $111.49M
- **Total Fees:** $5.17M

4. Financial Goals & Portfolio Breakdown The project tracks progress against specific financial goals across different banking products:

- **Bank Loans:** Target/Status at $55.5M
- **Bank Deposits:** Target/Status at $60.18M
- **Business Lending:** Target/Status at $83.52M
- **Foreign Currency Amount:** $2.71M
- **Saving Accounts:** 2.71 Million

5. Key Findings & Observations

Analysis of the data revealed several trends regarding income bands and nationality:

- **Loan Distribution by Income:** Bank loans are observed to be highest for the "Mid Income" band and lowest for the "High Income" band.
- **Regional/Nationality Analysis**:

  Highest features (loans/deposits) are associated with European countries, followed by Asian countries.
  Lowest features are observed in Australian countries, followed by African countries.
  Specifically, Bank Loans are highest for European countries and lowest for Australian countries.

6. Conclusion

The Banking Dashboard effectively consolidates client data to track performance against financial goals. The analysis indicates a strong market presence in Europe and among mid-income clients, while highlighting potential areas for growth or strategic adjustment in the Australian and high-income segments.
